

MINHYEOK JANG

Software Engineer

UNISPARK, 50, UNIST-gil, Ulju-gun, Ulsan 44919

jangminhyeok@unist.ac.kr / disk1605@naver.com

OBJECTIVE

An Intermediate Software Engineer with 7+ years. Full stack Dev of website and mobile app, AI services. I mostly do startup incubating, r&d project planning, business management as co-founder or freelancer.

EDUCATION

2019- Present	Ulsan National Institute of Science and Technology (UNIST) <i>School of Business Administration (AACSB-accredited)</i> Expected Graduation, September 2026 Major: Business Administration Honors: Study Abroad Scholarship GPA: 2.88 Credits: 124.0
2023 Summer	University of California Berkeley (UC Berkeley) <i>Haas School of Business</i> - Completed the entrepreneurship program of Korea Innovation Center Washington D.C. - Developed the nail-art 3d scan AI solution and Ranked 5th out of 125 teams. - Directed and Raised 30M KRW in seed money from government.
2025 Summer	Hong Kong University of Science and Technology (HKUST) <i>School of Business and Management</i> - ISOM1380 Technology and Innovation: Social and Business Perspectives. - ISOM4010 Digital Business Strategy: Harnessing Platform, Crowd and Machine.

RESEARCH EXPERIENCE

2019	Research Associate <i>Ulsan Port Authority & UNIST GSIM</i> - Designed a machine learning process and pipeline for quality prediction of cargo. - Built sensor fusion and data acquisition system at two testbeds in bolt production.
2025- Present	Research Associate <i>UNIST Business Analytics Center</i> - Directing the planning of R&D project proposals and core research frameworks. - Developing an interdisciplinary framework in the field of business analytics. - Facilitated industry-academia collaboration of 80M KRW by connecting startups.
2025- Present	Research Associate <i>UNIST Digital Humanities Center</i> - Researching story generation and literary theory via large multimodal model. - Conducting computational stylistics research on modern Korean literatures. - Scheduled to present research findings at both ADHO 2026 and JADH 2026.

WORK EXPERIENCE

2019-2020	Pre-Startup Founder <i>UNISKY Co., Ltd.</i> - Developed the AI-embedded autonomous UAV system using Jetson, RealSense. - Directed and Raised 22M KRW in seed money from government.
2020-Present	Freelance Software Engineer <i>Sole Proprietorship</i> - Programmed the website and mobile applications, data crawling softwares. - Directed academic research subcontracts of GNTP and UIPA, TheBridge Co., Ltd. - Produced the business revenue over 135M KRW by executing subcontracts.
2021-2026	Co-Founder & CEO <i>K-STEAM Co., Ltd.</i> - Developed the block coding & physical computing mobile app by oneself. - Produced the business revenue over 400M KRW by product sales. - Directed and Raised 20M KRW in seed money from government.
2022-2025	Co-Founder & CTO <i>DNU Co., Ltd.</i> - Developed the mobile app of nail-art platform based on React Native by oneself. - Researched a semantic segmentation based virtual fitting system with AI model. - Directed and Raised 336M KRW in seed money from government.
2023-2024	Pre-Startup Founder <i>SelfFish Co., Ltd.</i> - Developed the hardware prototype and business plan of modular IoT fishtank. - Directed and Raised 45M KRW in seed money from government.
2024-Present	Co-Founder & COO <i>NeuralWave Co., Ltd.</i> - Established business partnerships, r&d infrastructures for AI call center solution. - Facilitated contracts of MOU & PoC with Busan Infrastructure Corporation. - Directed and Raised 620M KRW in seed money from government.

OTHER EXPERIENCE

2018	Construction Worker <i>Hwasan Engineering & Construction Co., Ltd.</i> - Assisted field engineers with scaffolding, concrete formwork, land surveying. - Worked in various regions such as Mokpo, Yeongam, Boseong, and Beolgyo.
2018- Present	Development of AI-Based Algorithmic Investment. - Designed and Programmed the Home Trading System for securities trading. - Researched the AI-Based stock prediction and time-series denoising system. - Participated in Data Alchemist Group (AI Quant) of U2A R&D Start-up Club.
2019- 2022	Club President <i>UNIST Student Clubs: Pinocchio (Robotics), UNIMOTORS (KSAE E-Formula)</i> - Raised 40M KRW for robotics club projects and Facilitated contracts of MOU. - Raised 30M KRW from UNIST Smart Mobility Center for KSAE E-Formula.
2019- 2023	Volunteer of donating an education - Organized and Instructed mentoring volunteers more than 30 people. - Mentored software education to students (adolescent) more than 250 people. - Created and Planned software education programs more than 20 cases.
2021- Present	Rental Cottage Manager <i>Lamer Haenam Co., Ltd.</i> - Developed and Designed the website with booking system, payment gateway. - Directed the accounting filings, compliance risk management, field engineering.
2021- 2023	Full-time Lecturer <i>Foundation for Industry Cooperation (FIC) of university of ulsan</i> - Mentored robotics and programming activities to students about 70 people. - Created STEAM education programs and related textbooks about 15 cases, belonging to Korea Foundation for Science and Creativity (KOSAC).
2021- 2025	Educational Developer <i>Ulsan Youth Science Enquiry Association</i> - Designed STEAM and software education curriculum about 13 cases under the supervision of 10 people of licensed teacher in association, belonging to KOSAC. - Coordinated and Mentored the curriculums to more than 160 schools in Korea.
2025- Present	Educational Developer <i>AI Education Research Society</i> - Developed block coding & physical computing web app with AI integrated feature. - Assisted the academic event for honored guests from Paro College of Education.

SKILLS

- JavaScript (ES6, React, React Native)
- Python (Django, Flask, PyQt)
- Data Analytics (Pandas, scikit-learn)
- Embedded System (Arduino, Jetson)
- HTML / CSS / Material Design
- Cloud (AWS, GCP)
- Deep Learning Engineering (TensorFlow, Keras, PyTorch)

INTERESTS

- Company Building (AC/VC)
- Algorithmic Investment
- Microcontroller & Firmware
- 3D Printing Technology
- Bartending
- Origami

AWARDS

2020	Promising Student Startup Team 300+ <i>Korea Entrepreneurship Foundation</i> • Participated with university club members and Ranked 7th out of 300 teams. • Completed a course of crowd funding simulation, IR pitching, et cetera.
2021 2nd Award	Data Hackathon for Artificial Intelligence <i>National Information Society Agency</i> • Developed a deep learning-based predictive marketing model with SNS data. • Mentored 9 middle school students on the R&E project.
2021	Commendation Award for Intellectual Property Development <i>Ulsan Metropolitan City Hall</i> • Contributed to the science and technology culture for educational programs. • Nominated by foundation for industry cooperation of university of ulsan.
2022 3rd Award	University Startup Contest <i>Kyungsang Ilbo</i> • Participated as K-STEAM Co., Ltd and Displayed an exhibition booth.
2023 2nd Award	Data Hackathon for MOIS Disaster and Safety Platform <i>National Disaster Management Research Institute</i> • Developed a reward system for public reports as mobile app with React Native.
2023 1st Award	Startup Idea Contest for Ulsan Regional University <i>Ulsan Center for Creative Economy & Innovation</i> • Participated with members of DNU Co., Ltd as a university representative.
2025	AI Innovation Award for Startup <i>UNIST Pioneers Campus Industrial Innovation Team</i> • Participated with members of NeuralWave Co., Ltd as a university research team.
